- ◆ Powerlifting (regional level)

PROFILE

Analytics Product Owner with 3+ years at L'Oréal managing the entire lifecycle of data and AI products. Expert in defining strategic vision, building technical roadmaps, and leading agile teams in a cloud environment (GCP). Recognized for translating complex business needs into innovative technological solutions (Agentic AI, LLMs) and aligning global teams (IT engineers, data scientists, stakeholders). Passionate about driving adoption and upskilling communities for AI at scale.

WORK EXPERIENCE

L'Oréal | Analytics Product Owner : Global Supply Chain

Jan. 2024 – Present

- Product vision and **strategy**: end-to-end ownership of a suite of **10+ products**; defined the **technical roadmap** and prioritized the backlog (SNOW) in alignment with L'Oréal's global ambitions.
- Innovation and **Agentic AI**: preparing LLM-based products (semantic layers) in collaboration with IT engineering; spearheaded the GenBI / Talk with your Data initiative for **200+ global users**.
- Cloud technology: designed and deployed scalable solutions on **Google Cloud (GCP / BigQuery)**; translated complex business needs into clear requirements for development teams.
- Global collaboration: daily bridge between IT and business (Global and 7 Zones); managed stakeholders at all hierarchical levels, including **C-level** executives.
- Adoption and upskilling: engagement plan driving platform adoption (**NPS 50+**); led **sharing sessions** (webapp frameworks, AI for PMs) to upskill colleagues and the tech community.

L'Oréal | Tech Project Lead : Transformation & Adoption

Sept. 2022 – Dec. 2023

- Agile project management: executed a major system transformation program (SAP to Manhattan) with **100+ test cases** validated and technical compliance ensured.
- Stakeholder management: aligned IT teams, operations, and external partners to deliver high-quality products within tight deadlines.
- Change management: drafted technical documentation and led **~50h of training** to guarantee the adoption of new tools.

L'Oréal | Copacking Planner

Jan. 2022 – Jul. 2022

- Data analysis: built monitoring dashboards enabling a **20% gap reduction** through close collaboration with partners.

EDUCATION

Grenoble INP – Génie Industriel
