- ◆ Powerlifting (regional level)

PROFILE

Analytics Product Owner with 3+ years at L'Oréal managing the entire lifecycle of data and AI products. Expert in defining strategic vision, building technical roadmaps, and leading agile teams in a cloud & BI environment (GCP, PBI). Recognized for translating complex business needs into innovative technological solutions (Agentic AI, Data Viz / Simulation) and aligning global teams (IT engineers, designers, data scientists, stakeholders). Passionate about driving adoption and upskilling communities for AI at scale.

WORK EXPERIENCE

L'Oréal | Analytics Product Owner : Global Supply Chain

Jan. 2024 – Present

- Product vision and **strategy**: end-to-end ownership of a suite of **10+ products**; defined the **technical roadmap** and prioritized the backlog (SNOW) in alignment with L'Oréal's global ambitions.
- Innovation and **Agentic AI**: preparing LLM-based products (semantic models, test frameworks, talk to your data agents) in collaboration with IT engineering; spearheaded the beginning of GenBI / Talk with your Data initiative for **200+ global users**.
- Cloud technology: designed and deployed scalable solutions on **Google Cloud (GCP / BigQuery)**; translated complex business needs into clear requirements for development teams.
- Global collaboration: daily bridge between IT and business (Global and 7 Zones); managed stakeholders at all hierarchical levels, including **C-level** executives.
- Adoption and upskilling: engagement plan driving platform adoption (**NPS 50+**); led **sharing sessions** (webapp frameworks, AI for PMs) to upskill colleagues on new tech initiatives.

L'Oréal | WMS Tech Project Lead : Transformation & Adoption

Sept. 2022 – Dec. 2023

- Agile project management: executed a major system transformation program (SAP to Manhattan) with design, configuration, **100+ test cases** validated and technical compliance ensured.
- Stakeholder management: aligned IT teams, operations, and external partners to deliver high-quality products within tight deadlines.
- Change management: drafted technical documentation and led **~50h of training** to guarantee the adoption & satisfaction of new tools to drive business impact.

L'Oréal | Copacking Planner

Jan. 2022 – Jul. 2022

- Operational performance: managed planning and logistics for promotional catalogues, achieving a **99% service rate**.
- Data analysis: built monitoring dashboards enabling a **20% gap reduction** through close collaboration with partners.

EDUCATION

Grenoble INP – Génie Industriel

2019 – 2022

Engineering Degree: Data, Information Systems & Supply Chain

- Specialization: Data Science, Operations Research, Tech Project Management.

École Polytechnique de Montréal

2021 – 2022

Academic Exchange: Computer Science & Industrial Engineering

- Machine Learning, Data Mining, Optimization.
