

NILS LEVILLAIN

Product Manager | Discovery & Innovation @ L'Oréal

✉ levillain.nils@gmail.com ☎ +33 06 69 56 69 37 📍 Paris, France 📄 nils-levillain 🌐 NilsLevillain

SKILLS

PRODUCT MANAGEMENT

- Discovery & User Research
- Product Strategy & Roadmap
- Hypothesis Testing & Figma
- Go-to-Market & Adoption
- Behavioral Change

DATA & AI

- GCP (BigQuery)
- SQL
- Python (ML)
- Power BI (DAX)

METHODS

- Agile / Scrum
- Change Management
- Stakeholder Alignment

CLIFTONSTRENGTHS

- #1 **Competition** Influencing
- #2 **Achiever** Executing
- #3 **Learner** Strategic Thinking

LEADERSHIP

Delegate

One Young World · 2024 – 2025
Global sustainability and responsible leadership summit; 9-month programme to build lasting positive impact.

President of Sports Committee
Grenoble INP · 2020 – 2021

27 people managed, €25K budget.

INTERESTS

- ◆ Music & Art (self-taught guitarist and bassist)
- ◆ Skiing (10 years of club competition)
- ◆ Powerlifting (regional level)

PROFILE

Product Manager with full-cycle ownership: user discovery, prototyping, build, global deployment and adoption measurement. Specialist in the Fulfillment domain (Transport, Customs, Warehouses) within global matrixed organisations operating under high complexity, tight timelines and budget accountability. Expert across the three axes structuring Supply Chain performance: operational costs, compliance and performance, sustainability. Passionate about products that drive lasting behavioral change in high-stakes, fast-paced environments.

WORK EXPERIENCE

L'Oréal | Product Manager – Global Supply Chain Analytics

Jan. 2024 – Present

- End-to-end ownership of a suite of **10+ analytics products** for global Fulfillment (Transport, Customs, Warehouses); **200+ users**, **NPS 50+**; full autonomy over **product vision, strategy and roadmap** shaped by business priorities.
- Continuous discovery**: 30+ user interviews cross-zone/function; **Figma** prototyping and AI POCs before building; hypotheses validated or discarded based on user feedback, including full dashboard redesigns after invalidating initial directions.
- Business and sustainability impact**: CO2 Transport calculator (**~50% air freight**) and alignment of **7 global zones** on shared calculation methods (DC costs, performance, CO2); No Waste tool (ML forecasting + optimisation): **2M€/year projected** (preserved revenue, FTE reduction, avoided destructions), ROI < 1 year.
- Lasting behavioral change**: users changed how they input data, embedded analytics into year-end reviews to discuss performance bonuses and manage business daily; adoption tracked via NPS dashboard, training kits and webinars.
- Innovation**: championed GenBI / **Talk with your Data**: hypothesis from user discovery to enable business users to answer their own questions without IT dependency; from user interview to working AI prototype.
- Coordination: **5+ business owners**, **10+ developers**, C-level executives for steering committees and budget decisions in a global, matrixed organisation.

L'Oréal | Project Lead – WMS Transformation & DC Productivity

Sept. 2022 – Dec. 2023

- Led **SAP to Manhattan** WMS transformation: identified operational and strategic blind spots, defined and executed the change programme: **100+ test cases**, productivity and compliance improved and measured.
- Data and visibility**: **20+ BI reports** answering key questions on DC costs, productivity and compliance; insights previously unavailable to management.
- Behavioral change**: full documentation, **~50h training** for operators and team leaders; sustained adoption of new ways of working post-deployment.

L'Oréal | Copacking Planner

Jan. 2022 – Jul. 2022

- Senior responsibilities (end of internship): planning, procurement and logistics for Garnier's promo catalogue (**99% service rate**).
- BI and **stakeholder management**: monitoring reports enabling a **~20% stock gap** reduction with the co-packer.

EDUCATION

Grenoble INP – Génie Industriel

2019 – 2022

Engineering Degree · Supply Chain, Data & Information Systems

- Grande École · Data Science, Operations Research, Project Management.

École Polytechnique de Montréal

2021 – 2022

Academic Exchange · Industrial Engineering & Computer Science

- ERP (SAP), Data Mining, Machine Learning.
